GETTING STARTED WITH RUNDOO · INTEGRATIONS

Astro Loyalty

Ring up the pet sale once in Rundoo, then click one button to send it to Astro. No double entry.

THE ONE-CLICK FLOW

1

Ring it up

Add the customer and products as usual, in POS.

Products need the manufacturer UPC

2

Send the cart

Scroll the cart to the Loyalty section.

Click Astro Loyalty (once)

3

Done

Astro opens, card punches, rewards count.

No re-typing anything

First sale for a customer (one time only)

1. Click **Astro Loyalty**; Astro asks you to confirm who they are.
2. Already in Astro? Find them and click **Select**.
3. New to Astro? Click **Create New Astro Account**, then **Save Pet Owner**.
4. After that, every sale is one click.

Record a reward, two ways

Coupon → Add discount

Free product → put a general note like "eligible free" on the paid line, then add the free item as its own line at **$0.00**. Redeem it first on the Astro side: **Unredeemed rewards → Checkout → Finished**.

Two habits: click Astro Loyalty **once** per sale (every click re-sends the cart and re-counts rewards), and know that a voided or abandoned sale still logs the reward, the hand-off is one-way. You can remove it in Astro if you need to.
