

GETTING STARTED WITH RUND00 · OPEN THE BOX

Set Up Your Card Reader

Unbox it, get it on Wi-Fi, let it update, then hand Rundoo the 3-word code. We pair it, and you're taking cards.

WHAT'S IN THE BOX

1

Dock

The cradle the reader sits on.

Power cord plugs in here

2

Reader

White S710 touchscreen. Tap, chip, or swipe.

Sits on the dock

3

Power cord

Wall outlet to the dock.

Leave it plugged in

Set it up in 6 steps

- 1 Dock the reader and **plug in power**.
- 2 **Hold the power button** (right side); pick country and language.
- 3 Join your **Wi-Fi** (same network as your computer, password required).
- 4 Say **yes to the update**. 20 to 30 min. Don't unplug it.
- 5 **Send the 3-word code** to your IM (or Support chat). We pair it.
- 6 **Test**: add a product, pick it under **Choose a reader**, watch the total appear.

Keep handy**Code: smartly-wire-mobile**

3 hyphenated words. You never type it in, you send it to us. Admin PIN if asked: **07139**.

The code expires in about 15 minutes. Drop it into your Rundoo support chat the second it appears instead of emailing it. If it lapses, the reader makes a new one, so refresh and resend.

Total never showed on the reader? It's almost always that the reader and computer are on different networks, or the update didn't finish. See [Card reader troubleshooting](#).
