

GETTING STARTED WITH RUND00 · E-COMMERCE

Your Store, Now Online

One toggle in Admin turns on online ordering, so customers shop your catalog and pick up in store.

SET IT UP IN ADMIN → COMPANY → E-COMMERCE

1

Turn it on

One toggle powers both the mobile app and the web store.

[Enable e-commerce](#)

2

Order printer

Per location: pick where an incoming order prints so the counter stages it.

[Per-location table](#)

3

Ignore inventory

Per location: hide and ignore stock, or show stock and block out-of-stock.

[Hide and ignore stock levels](#)**Go online in 3 steps**

- 1 In Admin, open Company and scroll to E-commerce.
- 2 Flip **Enable e-commerce** on.
- 3 Set each location's **printer** and **stock**, then share [yourstore.rundoo.store](#).

What customers see**Grid, prices, stock, cart**

Not signed in = your **retail** prices. Signed in = their **account** pricing. Pay by card; orders arrive as sales.

Pickup, not shipping: online orders are buy online, pick up in store. Rundoo does not ship online orders, so delivery is handled off the web store.

Already had the mobile shop? The web store turns on automatically, nothing to re-enable. If a shop view is blank, first confirm Enable e-commerce is on.
